

V-CG-S 4 – 400 W Monitoring Module

V-CG-S 4 – 400 W

- Low operating costs due to decreased standby losses < 0.5 W
- Minimized dimensions on the basis of conventional T5 EVG cross section (H x B: 21 x 30 mm) for an eased mounting in narrow luminaires
- Without protective conductor connection. For the use in luminaires with insulation class I or II
- Variable mounting possibilities for different mounting positions (horizontal or sidewise upright)
- Avoidance of installation failures due to a mains connection being protected against polarity reversal
- Universal monitoring module for loads 4 – 400 W
- Shortened inspection effort due to the CEWA GUARD and S⁺-Technology
Automatic function monitoring of up to 20 luminaires per circuit
- Reduced installation costs due to STAR-Technology
Freely programmable mixed operation of the switching modes per luminaire in one circuit
- Reduced installation expenditures as no additional data line to the luminaires is needed
- Enlarged ambient temperature range

Dimensions in mm

Module housing

Rated voltage ranges	220 - 240 V, 50/60 Hz / 176 - 275 V DC
Standby power loss	< 0.5 W (230 V / 50 Hz)
Power input	4 W-400 W
Max. permitted inrush current	30 A
Maximum line length	50 m (module - luminaire)
Type of mounting	To be mounted in luminaires with protection category I or II
Degree of protection	IP20
Permissible temperature range	ta = -20 °C up to +60 °C
Maximal permissible test point temperature	tc = 75 °C
Connection terminals	Plug in terminals 1.5 mm ² / reserve-polarity protected
Dimensions in mm (H x L x W)	21 x 85 x 30
Housing material / colour	Flame retardant polycarbonate / grey
Weight	0.035 kg

Ordering details

Scope of supply	Order No.
V-CG-S 4-400 W	40071352409
Module housing with strain relief	40071352765

Attention! The following parameter must be observed.

sliding-switch	I_{ok}	$\hat{I}_{n.ok}$	* If the lamp is faulty the charging rate of the control gear must be smaller than $\hat{I}_{n.ok}$.
ON	> 47 mA	< 28 mA	
OFF	> 16 mA	< 10 mA	

For the use of standard control gears make sure that a correct function of the control gear is guaranteed as well in the voltage range of 186 to 275 V. We recommend to obtain a corresponding certificate of the manufacturer.

The disconnection of the control gears in case of lamp failure must occur within 1.6 seconds.

The current consumption of the ballast must be sinusoidal for AT-S⁺-systems.
